EXAMINER

BEFUMO, JENNA LEIGH

ART UNIT

PAPER NUMBER

1771

DATE MAILED: 07/02/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/021,456	Applicant(s) HARTGROVE ET AL.	
	Examiner Jenna-Leigh Befumo	Art Unit 1771	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 April 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-15 is/are pending in the application.
- 4a) Of the above claim(s) 1-7 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 8-15 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 21, 2004 has been entered.
2. The pending claims are claims 1 – 15. Claims 1 – 7 are withdrawn from consideration as being drawn to a nonelected invention.

Claim Rejections - 35 USC § 112

3. Claims 8 – 15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claims contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The flame retardant binder composition made from a halogenated derivative of a polyurethane backbone recited in claim 8 is not enable. A flame retardant composition based on a halogenated derivative of a polyurethane backbone cannot be found in any textbooks or in a search of the patents database. Further, the specific example Pyron 6135 mentioned in the examples cannot be found either. The name PYRON is a trademark which refers to PAN fibers which are fire retardant and one patent, US 5,437,690, discloses that pyron is a brominated chlorinated phosphonate flame retardant composition. However, no reference can be found which combines halogens with a polyurethane backbone to form a flame retardant composition. Should the backbone be

Art Unit: 1771

phosphorus backbone which is combined with halogens to form a fire retardant composition?

Since the polyurethane composition claimed by the Applicant, is not known or taught in the prior art, one of ordinary skill in the art would not be able to produce claimed product, since the disclosure does not teach how to make the binder having a halogenated derivative of a polyurethane backbone.

In the response filed April 21, 2004, the Applicant provided the MSDS for both Pyron 6135 and Pyron 6139 which are available from the chemical company Chemonics Industries. However, the MSDS do not provide the chemical structure of these compounds. Instead the chemicals are described generically as a "FR latex compound". While these chemicals might be available commercially, this is not sufficient evidence to enable the claimed flame retardant binder composition made from a halogenated derivative of a polyurethane backbone because neither of these documents establish that the chemical is actually a polyurethane compound. Further, the search done by the examiner did not turn up any compounds which contained halogenated polyurethanes, let alone fire retardant halogenated polyurethanes. And the only other mention of chemicals referred to as pyron and produced by Chemonics Industries is in US Patent 5,437,690 which discloses that the material is a fire retardant composition with a phosphorus backbone. Therefore, the Applicant must provide evidence that the chemical used as a fire retardant compound has a polyurethane backbone and not a phosphorus backbone to overcome this rejection.

Conclusion

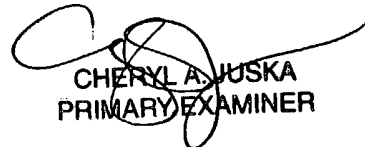

Art Unit: 1771

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jenna-Leigh Befumo whose telephone number is (571) 272-1472. The examiner can normally be reached on Monday - Friday (8:00 - 5:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terrel Morris can be reached on (571) 272-1478. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
